

What's good for Olympic athletes is good for you.

Signa HDe

Olympic athletes should be treated with world-class orthopaedic scanning technology. That's why two Signa® HDe MR scanners were purchased for the 2008 Olympic Games in Beijing.

Ask your doctor about the GE Signa HDe 1.5T MR imaging at The California Orthopaedic Institute. Our remarkable system was developed to make your non-invasive exam more comfortable, while still providing the exceptional image quality that your physician is looking for. So your MRI experience will be world class.

Call us at (619) 291-8930 for more information.
